

Economic Development Resources

Daniel Schmidt
Project Manager

Education:

- Bachelor of Arts, University of Missouri – Columbia

Experience:

Mr. Schmidt brings significant academic training in Geographic Information Systems (GIS) and computer assisted cartography to the business of economic development. Combined with his work with the state of Missouri's Enhanced Enterprise Zone program, Mr. Schmidt has gained substantial experience in the use of GIS in creating successful public/private partnerships.

Mr. Schmidt's expertise extends to a number of graphic information programs, including ArcMap, ArcView, ArcCatalog, ArcEdit and SketchUp which he keeps current through his participation at various national conferences and webinars. His skills also include creating three dimensional models and internet-based materials which are used by our clients in marketing their projects.

Prior to joining EDR, Mr. Schmidt had worked for the Department of Geography at the University of Missouri as a Research Specialist. His responsibilities included interactive online mapping applications, research concerning expanding the use of GIS for urban planning, and quality control/quality assurance (QA/QC) for the Department's cartographic products.
